

## Residential Collection Service Areas

### Unincorporated Area Residential Solid Waste Collector Information - March 2014

#### GENERAL INFORMATION

Currently, two solid waste collection companies provide service for all residential customers within the Unincorporated Area (UA) of Ventura County. By contract, each of these companies has the exclusive right to serve specific portions of the UA. Therefore, if a resident subscribes to collection service, he/she must use the collection company with the exclusive contract to serve the area in which the resident lives.

Standard residential service throughout the UA typically includes weekly service for three containers: one each for refuse, recyclables, and green waste. Some limited variations on this standard level of service are available through your solid waste collector. Rates for service are set by the County and vary depending on factors such as location and waste generation rates in a given service area.
