

COUNTY SERVICE AREA NO. 34
SEWER SERVICE

County Service Area No. 34 (CSA 34) was formed on December 1, 2005, for the purpose of constructing, operating, and maintaining a sewer collection system for the unincorporated area of El Rio, including the Strickland Tract. The sewer service area is approximately 850 acres, lying within the El Rio Forebay, and is bounded by the U.S. Highway 101 on the south, South Bank Road on the west and Rose Avenue on the east, and Strickland Drive on the north.

The sewage collection system in the Strickland Tract area was completed in December 2005. Property owners within the Strickland Tract connected to the sewer system in March 2006. The remainder of the system is being constructed in phases, based on available funding.

The sewage is pumped to the City of Oxnard for treatment and disposal. The Water and Sanitation Department is responsible for the administration, operation, and maintenance of the sewer collection system. The County Board of Supervisors is the governing body.
