

# MARKED CROSSWALKS

## WHAT ARE THE OFFICIAL GUIDELINES?

The County of Ventura follows the State guidelines outlined in the California Manual of Uniform Traffic Control Devices. This Manual covers all aspects of the placement, construction, and maintenance of every form of approved traffic control.

The Manual emphasizes uniformity of traffic-control devices. A uniform device conforms to the regulations for dimensions, color, wording, and graphics. The standard device should convey the same meaning at all times.

Consistent use of traffic-control devices protects the clarity of their messages. As stated in the Manual, uniformity must also mean treating similar situations in the same way. This approach is very important when deciding on where to place marked crosswalks on the higher speed sections of the County road system.

## WHAT IS A CROSSWALK?

Crosswalks are either marked or unmarked. The California Vehicle Code defines a “crosswalk” as the portion of a roadway at an intersection that is an extension of the curb and property lines of the intersecting street or is any other portion of a roadway that is marked as a pedestrian crossing location by painted lines.

A marked crosswalk is any crosswalk that is delineated by white or yellow painted markings placed on the pavement.

All other crosswalk locations are therefore unmarked.

## HOW ARE CROSSWALKS USED?

At marked or unmarked crosswalks drivers must yield the right-of-way to pedestrians. Crosswalks are marked mainly to encourage pedestrians to use a particular crossing. Studies conducted on crosswalks support minimal installation of marked crosswalks at locations where there are no stop signs or traffic signals.

## COLLISIONS AT MARKED CROSSWALKS

Recent research indicates that on multi-lane streets carrying volumes higher than 12,000 vehicles per day, pedestrian collisions are higher at marked versus unmarked crosswalks at uncontrolled locations, especially on higher speed roads. This is because pedestrians often step off the curb into the crosswalk expecting drivers of vehicles approaching the crosswalk to stop. However, drivers frequently fail to stop and cause an accident.

At all crosswalks, both marked and unmarked, it is the pedestrian’s responsibility to be cautious and alert before starting to cross the street.

Another frequent factor in causing accidents involves the driver of a vehicle in the lane nearest to the curb stopping for a pedestrian that is waiting to cross or who is already in the crosswalk. The driver of a second vehicle traveling in the lane next to the stopped vehicle tries to pass the stopped vehicle and hits the pedestrian crossing the street.

Pedestrians should be very cautious when walking in a crosswalk, especially when their visibility is limited by vehicles already stopped at the crosswalk as illustrated below:

### WHERE ARE CROSSWALKS NORMALLY MARKED?

Crosswalks are marked at intersections where there is substantial conflict between vehicle and pedestrian movements, where significant pedestrian concentrations occur, where pedestrians could not otherwise recognize the proper place to cross, and where traffic movements are controlled. Examples of such locations are:

- ✓ Approved school crossings
- ✓ Signalized and four-way stop intersections

It is the County's policy not to paint crosswalks at mid-block locations where traffic is not controlled by stop signs or traffic signals. Painted crosswalks should only be used where necessary to direct pedestrians along the safest route.

### WHAT ARE SPECIAL SCHOOL CROSSWALKS?

Marked crosswalks, established adjacent to a school building or school grounds, must be painted yellow. Other established marked crosswalks may be painted yellow if the nearest point of the crosswalk is not more than 600 feet from a school building or grounds. A marked crosswalk may be painted yellow if the nearest point of the crosswalk is not more than 2800 feet from a school building or grounds and there are no intervening crosswalks other than those contiguous to the school grounds.

Crosswalks should be marked at all intersections on the suggested route to school, available from your local school. They should also be marked where there is high conflict between vehicles and students (while crossing).

The best safety measure is to educate children on how and where to safely cross the street.

### REQUESTS AND INQUIRIES

If you have questions, requests, or suggestions, please call the Transportation Department at: **(805) 654-2049** or through the "Contact Us" link at:
